DETAILED ACTION

1. Claims 1-17 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claims 1 and 11, the value of variable Z is defined as NR^pY . However, R^a is not defined. On the other hand, R_a is defined which is not present in the claim. An appropriate correction is required.

In independent claims 1 and 11, the term ---MK-2 inhibiting---is indefinite since it is not clear whether this inhibition occurs in vitro or in vivo. The applicants are suggested to delete this term.

In claim 1, page 94, line 1, after when G is nitrogen, delete---is it --- and insert --it is---.

Claims 12-17 recite the limitation "R9 and R10 for variable G" in claim 11. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter:
The instant claims are allowable over the prior art since the instant method of making a tricyclic aminocyanopyridine compound is neither disclosed nor obvious over the prior art. In the prior art, O'Callaghan discloses a process for preparing compound of formula

3 by reacting salicylaldehyde 1 with malononitrile (see page 312). However, the process of O'callaghan differs from the instant process by using malononitrile instead of instant tricarbonitrile.
